OMICRON electronics GmbH
Sales & Application Engineer

www.omicronenergy.com

OMICRON electronics is the global market leader in a niche market segment of the electrical power industry, specializing in development and marketing of innovative test systems for measurement and protection technology. The application of OMICRON products allows users to assess the condition of the primary and secondary equipment on their systems with complete confidence. To strengthen our Team in Stafford, UK we are looking for a motivated

Sales & Application Engineer (m/f)

Your tasks

- you contribute to technical and commercial sales tasks, such as
 - providing product consultation, training and support within all areas of the power network to our customer base
 - providing on-site support to customers in all questions concerning OMICRON applications
- you are responsible for active sales development in support to the Area Sales Manager for the UK and Ireland
- you build customer relationships and provide customer, application and commercial support
- you prepare and hold product presentations and on-site demonstrations of our products
- you take part in exhibitions, seminars, conferences and user meetings
- you answer and solve application inquiries

Your profile

- you have a professional technical education in electrical engineering
- you have at least 3 years practical experience in the field of power system protection and high voltage apparatus and ideally as well in the field of generators, power transformers and circuit breakers
- you have at least 3 years sales or commercial experience in the field of power systems
- you are at ease giving presentations or training in front of an audience
- you are willing to undertake extensive travel (up to 60% of time) in the UK and Ireland territories
- you have an excellent command of English

We are looking forward to receiving your application.

Join the world of OMICRON.
